

EMS

Employee Management System

Documentation

Covers:
Admin Portal

1. Introduction

1.1 Purpose

This document provides a comprehensive reference for the EMS Product Admin Portal. It covers every screen within the portal, detailing the user interface layout, the components present on each screen, and the navigational flow between screen states. This documentation is intended to serve as a single source of truth for product, design, development, and QA teams.

1.2 Scope

The documentation covers all screens accessible through the Admin Portal, organized by navigation location — Sidebar Navigation and Top Navigation Bar.

1.3 Portal Overview

The EMS Admin Portal is an Employee Management System designed for administrators to manage workforce operations end-to-end. It provides tools for HR management, payroll, attendance, leave, performance reviews, learning, compliance, project management, and system security — all within a single unified interface.

1.4 Navigation Architecture

The portal has two levels of navigation:

Top Navigation Bar

- Dashboard — primary landing page
- Projects — project and task management
- Employees — employee directory
- Plans — subscription and billing
- Logs — activity logs and audit trail
- Security — security dashboard

Left Sidebar Navigation — grouped sections:

MAIN	Overview, Announcements, Tasks
TIME & ATTENDANCE	Attendance, Leave
COMMUNICATION	Chat

HR & FINANCE	HR Overview, Payroll, Expenses
GROWTH	Performance, Learning
RESOURCES	Documents, Analytics, Compliance

2. Sidebar Navigation Screens

2.1 Dashboard — Overview

Screen Name	Dashboard — Overview
Access Path	Default landing screen after login
Navigation Location	Sidebar > MAIN > Overview

Purpose

The Overview screen serves as the main dashboard, providing the Admin with a real-time snapshot of key workforce metrics, recent announcements, and active device sessions.

UI Sections

- Summary Stat Cards — displays high-level metrics: Active Workforces, Workforce Overview, Pending Projects, System Activity
- Announcements Panel — lists recent announcements with priority icons, metadata, and Mark All Read action
- Devices & Session Manager — shows logged-in devices with two sub-tabs: Devices and Sessions; each device entry has Trust and Remove actions

UI Flow

The Overview screen is read-oriented. The admin can mark announcements as read, trust or remove devices from the Devices tab, and switch between the Devices and Sessions sub-tabs.

2.2 Company Announcements

Screen Name	Company Announcements
Access Path	Sidebar > MAIN > Announcements
Navigation Location	Sidebar — MAIN section

Purpose

Allows the Admin to create, manage, and distribute organization-wide announcements. Provides tools to categorize, filter, and track announcements by type and status.

UI Sections

- Page Header — title, subtitle, and Create Announcement button
- Summary Stat Bar — metric cards showing total, unread, pinned, and expiring announcement counts
- Filter Tabs — All | Unread | Pinned | Events
- Search Bar and Filter Dropdown — text search combined with filter options: Normal, Pinned, Recent Updates, Priority, Expiry Free
- Announcements List — rows showing priority icon (color-coded), title, description preview, timestamp, and edit and delete action icons

Screen States & UI Flow

State	Trigger	Description
List View (Default)	Screen load	Full announcements list with filter tabs and search
Filter Dropdown	Click filter control	Dropdown with filter options appears
Create Announcement Modal	Click Create Announcement button	Form modal with Title, Priority, Expiry Date, Content, Notify fields
Edit Announcement Modal	Click Edit icon on a row	Same form pre-filled with existing announcement data
Delete Confirmation Dialog	Click Delete icon on a row	Confirmation popup; actions: Cancel or Delete
View Announcement Detail	Click an announcement row	Full-page view with complete content and Mark as Read action

2.3 Task Management

Screen Name	Task Management
Access Path	Sidebar > MAIN > Tasks
Navigation Location	Sidebar — MAIN section

Purpose

Provides a centralized view for the Admin to monitor, assign, edit, and track tasks across the organization. Supports status-based filtering and direct task editing.

UI Sections

- Summary Stat Cards — Active Tasks, Completed, In Progress, Overdue
- Assign Task button — top-right action to create a new task
- Filter Tabs — All | Review | In Progress | Done
- Task Cards List — each card shows: task title, date, assignee, service link (repository/pipeline), status and priority tags, Edit and Delete actions

Screen States & UI Flow

State	Trigger	Description
List View (Default)	Screen load	All tasks with filter tabs and action buttons
Create Task Modal	Click Assign Task button	Form with: Task Title, Status, Priority (Low/Medium/High), Assigned To, Category, Due Date, Estimated Hours, Repository, Git Branch, Pull Request, Description
Edit Task Modal	Click Edit on a task card	Same form pre-filled with existing task data; Save Changes action
Delete Task	Click Delete on a task card	Task is removed after confirmation

2.4 Attendance Overview

Screen Name	Attendance Overview
Access Path	Sidebar > TIME & ATTENDANCE > Attendance
Navigation Location	Sidebar — TIME & ATTENDANCE section

Purpose

Provides the Admin with a comprehensive view of employee attendance across multiple dimensions: daily records, overtime, regularisation requests, history, and monthly summaries.

UI Tabs & Sections

Tab	Description
Today's Record	Default view with stat cards and attendance table (columns: Employee, Check-in, Check-out, Status, Work Hours). Supports search and date filter. A row action triggers a modal for marking or viewing attendance detail.
Overtime	Table of overtime records with columns for extra hours, date, and approval status. Includes per-row action controls.
Regularisation	Lists regularisation requests per employee showing date, reason, and status (Pending / Approved / Rejected). Per-row action buttons.
History	Date-range based historical attendance table. Columns: Date, Check-in, Check-out, Hours, Status. Includes pagination.
Monthly Summary	Visual summary with a line or bar chart showing attendance trends, plus a summary table with color-coded status indicators per employee.

UI Flow

- Admin lands on Today's Record tab by default
- Switching tabs changes the data context — all tabs share the same base layout
- Search and filter controls are tab-specific
- On Today's Record, clicking a row action opens a modal for attendance detail or marking

2.5 Leave Management

Screen Name	Leave Management
Access Path	Sidebar > TIME & ATTENDANCE > Leave
Navigation Location	Sidebar — TIME & ATTENDANCE section

Purpose

Enables the Admin to manage all employee leave requests, view leave balances by type, track approval workflows, and review monthly leave distribution.

UI Tabs & Sections

Tab	Description
All Leaves	Default view. Stat cards + leave table (Employee, Leave Type, From, To, Days, Status, Actions). Apply Leave button and filter controls.
Pending	Filtered view of pending requests. Apply Leave modal accessible from here — form fields: Leave Type, From Date, To Date, Reason, Notify.
Approved	Filtered table of approved leave records. Read-only action per row.
Leave Balance	Displays leave entitlements per employee and leave type breakdown (Allocated, Used, Remaining Balance).
Monthly Summary	Calendar-style or grid view of monthly leave data with color-coded status indicators. Multiple months viewable.

Screen States & UI Flow

State	Trigger	Description
List View	Screen load	All Leaves tab with search, filter, and table
Apply Leave Modal	Click Apply Leave button	Form: Leave Type, From/To Dates, Reason, Notify toggle; actions: Cancel / Submit
Filter Applied	Use filter controls	Table narrows to matching results

2.6 Chat Communication

Screen Name	Chat
Navigation	Communication > Chat
Purpose	Enables real-time communication between employees, Managers through channels, rooms, and direct messages.

The Admin Portal provides complete control over platform operations, communication systems, permissions, and organizational configurations. Admins can manage all public and private channels, oversee department collaboration spaces, and control role-based access across the platform. The portal is designed for enterprise-level administration, security, and centralized operational management.

UI Sections & Sub-Screens

- Default State — Community workspace with Channels, Rooms, and Direct Messages in left panel; prompt to select a conversation; Check Mentions and Create Room quick actions
- Channel Conversation View — Active channel messages in main area; message input bar with attachment, emoji, and send options; right panel tabs: Members, Files, Starred, Info
- Members Tab — Online and offline member list; Generate Link / Invite option
- Files Tab — All files shared in the channel with file type and size
- Starred Tab — Bookmarked messages with Delete All option
- Info Tab — Channel name, description, type, visibility, and member list grouped by online/offline status
- Message States — Sent indicator, Read indicator, React (emoji and Reply on hover), Typing state, After-type state
- Add Member Modal — Search for people, select from list, Add Member button
- Create Room Modal — Room name input, Add Participants search, Create Room button

UI Flow

- Admin selects a channel, room, or direct message from the left panel
- Conversation opens in the main area with the right panel for additional details
- Admin can send messages, attach files, react to messages, and reply
- Tabs in the right panel switch between Members, Files, Starred, and Info views
- New members are added via the Add Member modal from the Members tab
- New rooms are created via the Create Room modal from the default state

2.6 HR Overview

Screen Name	HR Overview
Access Path	Sidebar > HR & FINANCE > HR Overview
Navigation Location	Sidebar — HR & FINANCE section

Purpose

The central hub for managing the employee directory. Supports viewing, creating, editing, deleting, and onboarding employee profiles. Provides bulk operations and employment history tracking.

UI Sections

- Summary Stat Cards — Total Employees, Active Today, On Leave, Pending Onboard
- Action Buttons — Upload Document, Onboard Task, Create Profile
- Filters — Search bar, Department dropdown, Status filter, Sort (Emp ID), Reset
- Employee Table — columns: #, Employee (avatar + ID), Name, Designation, Department, Status, Actions (View button + Kebab menu)
- Bulk Action Bar — appears when rows are selected; options: Edit, Delete, History, Bulk Onboard
- Pagination

Screen States & UI Flow

State	Trigger	Description
List View	Screen load	Full employee table with filters and action buttons
Kebab Menu	Click : on a row	Dropdown with: View History, Remove Employee
Employee Profile — View Mode	Click View button	Modal with Identity (read-only), Personal Details, Bank Details, Contact Info, Emergency Contact, Documents sections; actions: Close, Edit Profile
Employee Profile — Edit Mode	Click Edit Profile in view modal	Same modal with fields editable; action: Close, Update Profile
Employment History Modal	Kebab > View History	Modal listing employment records; Add New Entry form (Company, Designation, Start Date, End Date, Job

		Description); Edit/Delete per entry
Delete Confirmation	Kebab > Remove Employee	Dialog requiring user to type DELETE to confirm; action: Cancel or Permanently Delete
Create Profile — Step 1	Click + Create Profile	Multi-step modal Step 1 — Personal Info: First Name, Last Name, Work Email, Phone, DOB, Address, Emergency Contact
Create Profile — Step 2	Click Next on Step 1	Step 2 — Role & Pay: Employee ID, Join Date, Department, Designation, Employment Type, Reporting Manager, Annual CTC, Work Location
Create Profile — Step 3	Click Next on Step 2	Step 3 — Access: System Role selector (Admin / Employee / HR Manager / Manager), Welcome Email toggle, Notes; action: Create Profile

2.7 Payroll Administration

Screen Name	Payroll Administration
Access Path	Sidebar > HR & FINANCE > Payroll
Navigation Location	Sidebar — HR & FINANCE section

Purpose

Provides the Admin with payroll management capabilities including running payroll, managing deduction rules, and configuring tax and PF compliance settings.

Sub-Screens

Payroll Dashboard (Default)

- Summary Stat Cards — Total Employees on payroll, Payroll Cost, Deductions, Pending Runs
- Action Buttons — Payroll History, Run Payroll
- Pre-Payroll Alerts — list of issues (missing attendance, unapproved leaves, unassigned salary structure, missing bank details) with employee counts
- Recent Payroll Runs — list with month, employee count, total amount, status (Paid / Pending); View All link
- Quick Access Cards — Salary Structures, Deductions, Tax & PF Settings

Deduction Manager

- Summary Stat Cards — Total Deductions, PF Contributions, TDS Collected, Active Rules
- Add Deduction button (top right)
- Deduction Rules List — rule name, type, amount/rate, category tag, Edit and Delete per rule
- Add Deduction Rule Modal — fields: Deduction Name, Category, Calculation Type, Amount/Percentage, Apply To, Recurring, Effective From, Notes; actions: Cancel, Add Deduction

Tax & PF Settings

- Action Buttons — Reset to Default, Save Settings
- Provident Fund section — Employee PF %, Employer PF %, PF Wage Ceiling, Enable EPF toggle
- Professional Tax section — State dropdown, Monthly PT amount, Add Tax Slab
- ESIC Settings section — Enable ESIC toggle, Employee Contribution %

- Income Tax Slabs panel — FY label, regime toggle, income range table with tax rate and Edit per row, Add Tax Slab

UI Flow

- Dashboard is the default landing screen
- Quick Access cards navigate to Deductions or Tax & PF Settings sub-screens
- Payroll History button accesses historical payroll records
- Run Payroll triggers payroll processing from the dashboard or alerts section

2.8 Expenses

Screen Name	My Expenses & Reimbursements
Access Path	Sidebar > HR & FINANCE > Expenses
Navigation Location	Sidebar — HR & FINANCE section

Purpose

Provides the Admin with a centralized view of all employee expense claims and reimbursements. Supports reviewing, approving, rejecting, and reimbursing claims, as well as managing expense categories.

UI Sections

- Summary Stat Cards — Total Claims, Pending Review, Reimbursed, Rejected
- Filter Tabs — All | Submitted | Under Review | Approved | Rejected | Reimbursed
- Search bar and Export button
- Claims Table — Employee, Amount, Category, Date, Description, Receipt, Status, Actions (view / edit / delete)
- Expense Categories Section — category cards showing Budget Limit, Category Type, Requirements (Receipts / Approval)

Screen States & UI Flow

State	Trigger	Description
List View	Screen load	All claims with filter tabs and table
Filter Tab Applied	Click any status tab	Table filtered to matching claims
Claim Detail — Under Review	Click View on a claim	Detail page with Quick Actions (Approve Claim / Reject Claim) and Claim Timeline
Claim Detail — Approved	View an approved claim	Quick Actions show: Mark as Reimbursed
Claim Detail — Rejected	View a rejected claim	Quick Actions show: Approve Claim

2.9 Performance & Reviews

Screen Name	Performance & Reviews
Access Path	Sidebar > GROWTH > Performance
Navigation Location	Sidebar — GROWTH section

Purpose

Enables the Admin to create and manage performance review cycles, track review submissions, assess employees through multiple review types, and view aggregated performance summaries and scores.

UI Sections

- Top Tabs — Performance Goals | Reviews
- Action Buttons — Create Review, Manager Review, Create Cycle
- Summary Stat Cards — Active Cycles, Pending Reviews, Avg Score, Promotions
- Filter Dropdowns — Review Cycles, All Reviews, Manager's Assessments, Employee Assessments, Summary & Scores

Performance Goals Tab - Overview

- Goals Sub-tab — Summary cards: Goals, KPIs, Updates, Categories; My Goals list with progress bars and priority badges; Goals Summary Table (Goal, Type, Category, Priority, Target, Start, End, Progress, Status)
- Create Goal Modal — Form fields: Title, Type, Category, Status, Date range, Description, Target Value, Unit; KPI Progress Update section; Milestones section; Comments section; Actions: Create Goal, Close
- View Goal Modal — Read-only version of the Create Goal modal
- Edit Goal Modal — Editable version with Post Update and Post Comment options
- KPI Tracking Sub-tab — KPI metric cards with progress bars and threshold indicators; KPI Summary Table (KPI Name, Department, Target, Current, Threshold, Variance, Status)
- Create KPI Modal — Form fields: Name, Unit, Description, Target Value, Current Value, Floor Value, Date range, Thresholds, Frequency, Category, Active toggle; Actions: Create KPI, Close
- Progress Updates Sub-tab — Goals list with progress percentage and last updated date; Goal Completion Rate donut chart
- Log Progress Update Modal — Form fields: Goal name, Current Progress (%), Date, Notes; Actions: Save Update, Cancel
- Categories Sub-tab — Category Insights banner; All Categories table (Category Name, Description, Goals, Avg Progress, Status)
- Create Category Modal — Form fields: Category Name, Description, Color Theme, Owner, Status toggle; Action: Close

Performance Goals Module — Detailed Documentation

2.9.1. Performance Goals Tab

The Performance Goals section acts as the centralized workspace for managing goals, KPIs, updates, and performance categories.

The module is divided into:

- Goals
 - KPI Tracking
 - Progress Updates
 - Categories
-

2.9.2. Goals Sub-tab

The Goals sub-tab provides an overview of all performance goals across the organization.

Top Summary Cards

The top section contains interactive analytics cards displaying:

Goals

Displays:

- Total number of active goals
- Completed goals
- Pending goals
- Overdue goals

KPIs

Displays:

- Total KPIs being monitored
- KPI achievement percentage
- High-performing metrics
- KPI status distribution

Updates

Displays:

- Recent progress updates
- Employee submissions
- Recently modified goals
- Performance activity logs

Categories

Displays:

- Total goal categories
 - Category-wise performance distribution
 - Active departments
 - Performance segmentation
-

My Goals List

A personalized goals section displaying:

- Goal title
- Goal category

- Assigned department
- Progress percentage
- Priority badges
- Due dates
- Current status

UI Components

- Interactive progress bars
- Color-coded priority badges
- Status indicators
- Hover action menus
- Quick update buttons

Priority Types

- High
- Medium
- Low
- Critical

Goal Status Types

- Not Started
- In Progress
- On Hold
- Completed
- Overdue

Goals Summary Table

The main goals table provides detailed structured information.

Table Columns**Column Description**

Goal	Goal title and summary
Type	Individual / Team / Department
Category	Assigned performance category
Priority	Goal importance level
Target	Expected measurable outcome
Start	Goal start date
End	Goal completion deadline
Progress	Current completion percentage
Status	Current goal state

Table Features

- Search functionality
- Department filters
- Sorting options

- Export capabilities
 - Row-based actions
 - Pagination
 - Bulk operations
-

2.9.3. Create Goal Modal

The Create Goal modal allows managers or employees to create new performance goals.

Form Fields

Basic Information

- Goal Title
- Goal Type
- Goal Category
- Goal Status
- Start Date
- End Date
- Goal Description

Performance Configuration

- Target Value
 - Measurement Unit
 - Expected Outcome
 - Goal Owner
 - Assigned Team
-

KPI Progress Update Section

Allows linking KPI metrics to goals.

Features

- KPI selection dropdown
 - KPI progress tracking
 - Current KPI performance
 - KPI threshold indicators
 - Linked KPI analytics
-

Milestones Section

Used to divide goals into measurable phases.

Features

- Add milestone
 - Milestone deadlines
 - Completion tracking
 - Milestone status
 - Progress indicators
-

Comments Section

Allows collaboration and communication around goals.

Features

- Team comments
 - Progress discussions
 - Update logs
 - Timestamped conversations
 - Mention users
-

Modal Actions

- Create Goal
 - Save Draft
 - Close Modal
-

2.9.4. View Goal Modal

The View Goal modal provides a read-only version of the goal information.

Displays

- Goal details
- KPI metrics
- Milestone progress
- Performance history
- Team comments
- Activity logs
- Completion insights

Features

- Timeline visualization
 - Progress analytics
 - Status indicators
 - Read-only KPI charts
-

2.9.5. Edit Goal Modal

The Edit Goal modal allows authorized users to modify goal information and performance updates.

Editable Sections

- Goal details
 - KPI links
 - Milestones
 - Deadlines
 - Priority
 - Status
-

Post Update Feature

Allows employees or managers to submit progress updates.

Includes

- Update notes
 - Progress percentage
 - Attachments
 - Achievement summaries
-

Post Comment Feature

Enables collaborative discussions.

Features

- Comments
 - Mentions
 - Replies
 - Update discussions
 - Team collaboration
-

2.9.6. KPI Tracking Sub-tab

The KPI Tracking section helps organizations monitor measurable business and employee performance metrics.

KPI Metric Cards

Interactive KPI analytics cards display:

Information

- KPI title
 - Current performance
 - Target achievement
 - Variance indicators
 - Progress bars
 - Threshold status
-

KPI Status Indicators

Status Types

- Healthy
- Warning
- Critical
- Achieved

Threshold Indicators

- Floor threshold
 - Warning threshold
 - Target threshold
-

KPI Summary Table

Table Columns

Column	Description
--------	-------------

KPI Name	KPI title
----------	-----------

Department	Assigned department
------------	---------------------

Target	Expected KPI value
--------	--------------------

Current	Current KPI performance
---------	-------------------------

Column	Description
Threshold	Performance threshold
Variance	Difference from target
Status	KPI condition

Table Features

- KPI filtering
 - Department analytics
 - KPI sorting
 - Export reports
 - Performance comparison
-

2.9.7. Create KPI Modal

The Create KPI modal allows organizations to create measurable performance indicators.

Form Fields**Basic Details**

- KPI Name
- Unit
- Description

Performance Values

- Target Value
- Current Value
- Floor Value

Timeline

- Start Date
- End Date

Threshold Configuration

- Warning threshold
- Critical threshold
- Target threshold

Additional Settings

- Tracking Frequency
 - KPI Category
 - Active Toggle
-

Actions

- Create KPI
 - Save Draft
 - Close
-

2.9.8. Progress Updates Sub-tab

This section focuses on tracking continuous goal performance updates.

Goals Progress List

Displays:

- Goal title
- Progress percentage
- Last updated date
- Assigned employee
- Current status

Features

- Quick updates
 - Timeline activity
 - Progress history
 - Performance trends
-

Goal Completion Rate Chart

A visual analytics section containing:

- Donut chart visualization
 - Goal completion statistics
 - Department-wise completion rate
 - Active vs completed goals
-

2.9.9. Log Progress Update Modal

Allows employees or managers to submit structured progress updates.

Form Fields

- Goal Name
 - Current Progress Percentage
 - Update Date
 - Notes / Achievements
-

Features

- Update timeline
 - Activity tracking
 - Progress history
 - Performance notes
-

Actions

- Save Update
 - Cancel
-

2.9.10. Categories Sub-tab

The Categories section organizes goals into structured business performance groups.

Category Insights Banner

Displays:

- Total categories
 - Performance analytics
 - Goal distribution
 - Average completion rate
 - Active category trends
-

All Categories Table

Table Columns

Column	Description
Category Name	Performance category title
Description	Category purpose
Goals	Number of assigned goals
Avg Progress	Average completion percentage
Status	Active / Inactive

Features

- Category filtering
 - Department mapping
 - Progress analytics
 - Category insights
 - Status management
-

2.9.11. Create Category Modal

Allows administrators to create structured performance categories.

Form Fields

- Category Name
 - Description
 - Color Theme
 - Category Owner
 - Status Toggle
-

Features

- Theme customization
 - Category assignment
 - Department linking
 - Visibility management
-

Actions

- Create Category
 - Close Modal
-

Reviews Tab — View States

View / State	Description
Default (No Cycle Selected)	Left panel lists review cycles; right panel shows empty state prompt
Selected Cycle View	Cycle highlighted; right panel shows cycle details, progress indicators, and review list
Cycle Stats Modal	Triggered from cycle view; shows aggregate stats (total, completed, avg score) and progress bars
All Reviews — Filter Tabs	Tabs: All Completed Pending Overdue; table columns: Employee, Cycle, Type, Score, Status
Manager's Assessments	Table with: Employee, Review Cycle, Review Group, Submitted, Status; + Add Review button
Employee Assessments	Table with: Employee, Reporting Manager, Cycle, Score, Promotable, Status; New Group Review button
Summary & Scores	Aggregate score display, Score Distribution chart, Competency-wise Performance Scores, Top Performers, Training Needs sections
View Review Panel	Triggered by clicking a row; side panel with competency ratings, comments, Add Review action

Modal Screens

- Create Review Cycle Modal — fields: Cycle Name, Start/End Date, Department, Employee selection, Review type checkboxes (Self Assessment / Manager Evaluation / Free Feedback); actions: Cancel, Save as Draft, Create Cycle
- Create Review Modal — fields: Employee, Review Cycle, Review Type (Self / Peer / Manager / 360°), Reviewer (if not self), Due Date; actions: Cancel, Create Review
- Delete Assessment Dialog — confirmation with cascade deletion warning; actions: Cancel, Delete

2.10 Learning Management

Screen Name	Learning Management
Access Path	Sidebar > GROWTH > Learning
Navigation Location	Sidebar — GROWTH section

Purpose

Enables the Admin to create and manage courses and quizzes, assign learning content to employees or teams, track progress and completion, and analyze learning performance.

Top-Level Navigation

- Tabs: Courses | Quizzes | Analytics

Courses Tab — Default View

- Stat Cards — Total Courses, Enrollments, Quizzes, Certificates Issued
- Create Course button
- Filters — Search, Category, Status
- Course Cards Grid — icon, title, description, tags (difficulty / status / category), assigned avatars, completion progress bar, duration; per-card actions: View, Edit, Analytics, Assign

Create Course — 5-Step Flow

- Step 1 — Course Basics: Course Title, Short Description, Category, Difficulty Level, Duration, Deadline, Thumbnail (drag & drop)
- Step 2 — Content: Content Type selector, Upload Content (drag & drop), Learning Objectives, Tags
- Step 3 — Assign Users: Search & Select Employee, Or Assign by Team / Role, individual Add buttons
- Step 4 — Completion Rules: Require quiz toggle, Minimum passing score, Certificate on completion toggle, Send reminder notifications toggle, Allow retakes toggle, Reminder days before deadline
- Step 5 — Review & Publish: Read-only summary of all settings; actions: Save as Draft, Publish Course

Particular Course Page

- Course title, status badge, tags, action buttons: Edit, Assign Course, Send Reminder, Export Report
- Stat Cards — Total Assigned, Completed, In Progress, Not Started, Completion Rate %

- Enrolled Employees table — Employee, Status, Progress bar, Score, Last Active, Remind action

Edit Course Modal

- Add Module tab — Module Title, Content Type (PDF / Video / Link), upload area or URL input, Module Description
- Create Quiz tab — Quiz Title, CSV upload, Passing Score, Time Limit, Shuffle Questions, Allow Retakes

Send Reminder Modal

- Target Audience display, Message Preview; actions: Cancel, Send Now

Assign Course Modal — 3 Assignment Types

- Project Team — Select Team dropdown, Due Date, Notify toggle
- Specific Employee — Search & Add employees, Due Date, Notify toggle
- Entire Company — informational note, Due Date, Notify toggle

Quizzes Tab

- Stat Cards — Total Quizzes, Active, Avg Pass Score
- Create Quiz button
- Quiz Table — Quiz Title, Associated Course, Questions count, Pass Score, Time Limit, Status, Created Date, Edit and Delete actions

Create New Quiz Page

- Quiz Basics — Quiz Title, Associated Course, Time Limit, Passing Score %, Shuffle Questions toggle, Allow Multiple Attempts toggle
- Questions Section — Bulk Upload CSV option, + Add Question button; question cards: Multiple Choice type, question text, 4 options with correct answer radio, Copy and Delete per question
- Actions: Cancel, Save Draft, Publish Quiz

Edit Quiz Page

- Editable Quiz Basics (title, pass score, time limit)
- Questions section — same structure as create; correct answer highlighted
- Settings panel (right side) — Shuffle Questions, Allow Retakes, Show Answers After
- Status panel — Active / Draft status indicator
- Upload Questions CSV panel — drag & drop to replace questions
- Actions: Cancel, Save as Draft, Save Changes

Analytics Tab

- Alert banners — Employees Not Started, Low Completion Courses, Recent Quiz Failures
- Stat Cards — Total Enrollments, Avg Completion %, Avg Quiz Score, Quiz Pass Rate
- Sub-tabs — Employees | Courses | Quizzes
- Employees sub-tab — Completion Trend chart, Enrollment by Category chart, Employee table; clicking a row opens Employee Analytics page with enrolled courses and a Course Detail view
- Courses sub-tab — Course table with completion metrics; clicking a row opens Course Analytics page with enrolled employees table
- Quizzes sub-tab — Quiz Results table; clicking a row opens Quiz Analytics page with attempt details and Score Distribution panel

2.11 Document Management Screen

Description

The Document Management module enables HR to upload, view, download, and share documents. It provides tabbed views to organize documents by ownership and sharing status.

Tabs

- All Documents – Full document library
- My Documents – Documents owned by the logged-in user
- Shared with Me – Documents shared by others
- Shared by Me – Documents the user has shared (sharing activity log)

Sub-Screens & UI Flow

#	Sub-Screen	Description	Key Actions
1	Main Page – All Documents	Document list with Title, Category, Owner, Size, Version, Status, Access Level columns	View, Download, Upload Document
2	Upload Modal	Modal with Title, Description, Category, Tags, Access Level, File upload area	Cancel, Upload
3	Download Success	Same list view with success banner confirming download	Dismiss banner
4	View – Document Details	Modal with document metadata: Title, Status, Category, Description, Uploaded By, Size, Version, Downloads, Created, Tags	Close, Download
5	My Documents	Filtered list of documents owned by the current user	View, Download
6	Shared with Me	Filtered list of documents shared with the current user	View, Download
7	Shared by Me	Document Sharing Activity table: Document, Shared With, Shared By,	View sharing records

#	Sub-Screen	Description	Key Actions
		From/To, Expires, Actions	

Navigation Flow

- Documents menu → All Documents tab (default)
- Tab navigation: All Documents, My Documents, Shared with Me, Shared by Me
- Any row → View button → Document Details modal
- Any row → Download button → file downloads with success banner
- Upload Document button → Upload modal

2.12 Analytics & Reports

Screen Name	Analytics & Reports
Access Path	Sidebar > RESOURCES > Analytics
Navigation Location	Sidebar — RESOURCES section

Purpose

Provides the Admin with data-driven insights across three key dimensions: overall dashboard metrics, attendance trends, and team productivity analytics.

UI Tabs

Tab	Sections & Content
Dashboard	Refresh button. Today's Attendance stat cards (Total / Present / Late / Absent). Monthly Tasks Overview stat cards. Department Performance table (Department, Employees, Attendance Rate progress bar, Time Completion progress bar, Status).
Attendance Analytics	Date range filter bar (Last 7 Days / Last 30 Days / This Month / Last Month + custom range). Load Analytics button. Stat cards (Attendance Rate, Punctuality Rate, Avg Work Hours, Avg Overtime). Monthly Attendance Trend bar chart. Attendance Breakdown donut chart.
Productivity Analytics	Date range filter bar + Department filter. Load Productivity button. Stat cards (task counts + Completion Rate %). Priority Distribution horizontal bar charts (Medium / High / Low). Top Performers ranked table.

UI Flow

- Dashboard tab is the default view
- Attendance and Productivity tabs require applying a date range via the filter bar and clicking Load Analytics or Load Productivity
- All data is read-only — no editing available from this screen

2.13 Compliance & Policy Management

Screen Name	Compliance & Policy Management
Access Path	Sidebar > RESOURCES > Compliance
Navigation Location	Sidebar — RESOURCES section

Purpose

Provides the Admin with tools to create, publish, and track organizational compliance policies. Employees can acknowledge policies and the system records compliance metrics organization-wide.

UI Tabs & Sections

Tab	Description
Policies	Default view — All Policies table: Title, Category, Effective Date, Version, Status, Mandatory, Actions (View).
Pending	Grid of policy cards requiring acknowledgement — each card: icon, name, version, date, description, PENDING badge; actions: Read Full Policy, Acknowledge.
My Compliance	Stat cards (Policies, Acknowledged, Pending, Compliance Rate %). Progress bar. All Policies table with Acknowledged At column.
Categories	Policy Categories table: Name, Description, Policies count, Actions. + Add Category button.
Acknowledgments	All Acknowledgments table: Policy, User, Acknowledged At, IP Address. Search + policy filter.
Compliance Report	Organization-Wide Compliance Report: stat cards (Total Users, Total Acknowledgments, Total Pending, Avg Compliance Rate %). User Compliance Details table with inline progress bar per user. Export button.

Modal Screens

- Read Full Policy Modal — displays full policy content with metadata (category, version, dates); action: Close
- Confirm Acknowledgment Modal — policy name, confirmation statement, audit trail notice; actions: Confirm & Acknowledged, Cancel

- Add Policy Category Modal — fields: Description, Category Name; actions: Cancel, Save Category
- Create New Policy Modal — fields: Policy Title, Category, Description, Policy Content, Effective Date, Acknowledgment Deadline, Version, Status, Notify Employees; actions: Cancel, Save Draft, Publish Policy
- Post-Publish State — green success banner confirming policy published and employees notified

3. Top Navigation Bar Screens

Screen - 3.1 Project Management

Screen Name	Project Management
Access Path	Top Navigation > Projects
Navigation Location	Top Navigation Bar

Purpose

Allows the Admin to create and manage organizational projects, track progress, manage team assignments, and maintain task checklists per project.

UI Sections

- Summary Stat Cards — Total Projects, Active Projects, Completed, Delayed, Assigned
- Create Project button

Screen – 3.3 Security Dashboard

Screen Name	Security Dashboard
Access Path	Top Navigation > Security
Navigation Location	Top Navigation Bar

Purpose

Provides the Admin with a real-time view of security activity across the organization, including login monitoring, API usage, audit events, and system configuration controls.

UI Tabs & Sections

Tab	Description
Dashboard (Default)	Auto-refresh toggle + Refresh button. Alert banner for security warnings. Security Summary (Last 24 Hours) stat cards. Security Features panel (Rate Limiting, Field Encryption, Security Headers, Audit Logging, 2FA/MFA — each with enabled/disabled badge). 7-Day Statistics stat cards.
Rate Limits	User ID rate limit status input. API Rate Limit cards per endpoint (Default API, Search API, Export API, Upload API, Auth—Login, Auth—Register) — each showing remaining/total quota with color-coded progress bar.
Events	Filters: Event Type, Severity, From/To Date, Apply/Clear. Security Events table: Time, Event, Severity badge (Info / Warning), User, IP Address, Details, View action.
Encryption	Encryption Test section: descriptive text, Text to Encrypt input, Test Encryption button.
IP Blocklist	Blocked IPs count. Add IP form: IP Address + Reason (optional) + Block IP button. Empty state when blocklist is empty.
Configuration	Rate Limiting Configuration: Authentication and API endpoint rules with rate limits. Security Headers: active policy tags (X-Content-Type-Options, X-Frame-Options, X-XSS-Protection, Referrer-Policy, Permissions Policy, Content-Security-Policy). Encryption section: algorithm and status. Environment section: Debug Mode, CORS, HTTPS Enforced, Session Timeout.

Screen – 3.4 Plans & Billing

Screen Name	Plans & Billing
Access Path	Top Navigation > Plans
Navigation Location	Top Navigation Bar

Purpose

Allows the Admin to manage the organization's subscription plan, view billing details, manage payment methods, and access invoices.

UI Sections

- Summary Stat Cards — Current Plan, This Year Spent, Active Employee Seats, Storage Used
- Sub-tabs — Subscription | Payment Methods | Invoices

Sub-Tabs & States

State / Tab	Description
Subscription (Default)	Active Tier card: plan name, price, tier badge, Seats, Renewal Date, Billing Cycle, Auto-renewal toggle. Actions: Upgrade Plan, Modify Plan, Cancel Subscription. Feature Access list with checkmarks.
Choose Plan Modal	Triggered by Upgrade Plan or Modify Plan. 3 plan cards (Base, Pro, Premium) with pricing, feature lists, and Switch to / Current Plan actions.
Confirm Plan Switch Modal	Triggered by selecting a new plan. Warning about change impact and billing cycle timing. Actions: Cancel, Confirm Switch.
Cancel Subscription Modal	Triggered by Cancel Subscription. Active-until date, feature loss warning, employees affected count, optional cancellation reason input. Actions: Keep Plan, Confirm Cancellation.
Invoices Tab	Search, Status filter, Time range filter. Download All and Export CSV buttons. Invoice table: Invoice ID + period, Date, Amount, Payment Method, Status (Paid / Pending), Download action.

Screen - 3.5 Activity Logs & Audit Trail

Screen Name	Activity Logs & Audit Trail
Access Path	Top Navigation > Logs
Navigation Location	Top Navigation Bar

Purpose

Provides the Admin with a complete record of all system activity, API calls, user sessions, and security events. Supports searching, filtering, analytics, and detailed audit trails for compliance purposes.

UI Tabs & Sections

Tab	Description
Activity Logs (Default)	Export and Refresh buttons. Filters: User ID/Email, Action, Method, Model, Status Code, From/To Date, Apply/Clear. Activity logs table: Timestamp, User, Action badge (READ / CREATE / UPDATE / DELETE / LOGIN_SUCCESS / LOGIN_FAILED), Method, Endpoint, Status, Response time, IP, Details.
Search	Full-Text Search input + Search button. Same filter set as Activity Logs tab. Empty state until search is executed. Results shown in same table structure.
Analytics	Date range selector (Last 7 / 14 / 30 Days). Stat Cards: Total Logs, Active Users, Avg Response Time, Recent Errors. Actions Breakdown horizontal bar chart. Status Codes Breakdown bar chart. Recent Errors table.
Audit Trail	Filters: Module Name, Action, Apply/Clear. Object History Lookup: Model Name + Object ID + View History button. Empty state by default; results table: Timestamp, User, Action badge, Model, Object ID, Changes, View action.
User Sessions	Session Filters: User, Session Status, From/To Date, Apply/Clear. Pagination. User Sessions table: User, Email, Login Time, Logout Time, Duration, Status (Active / Ended), Device, IP Address, Location.
